

# Winter 2021

## RESPIRATORY VIRUS SWABS

For adults and children, one nasopharyngeal swab.

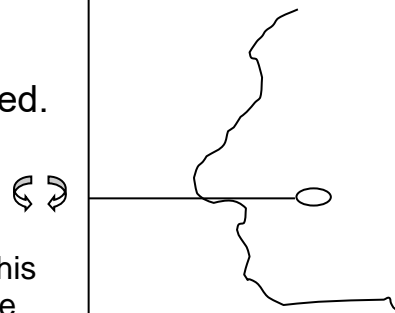

**RSV    Influenza A & B    SARS-CoV-2**

### NASOPHARYNGEAL SWABS

Rest back of patient's head against wall or bed.  
Insert swab 4-5 cm into nose in horizontal direction.

Rotate swab 3 x each way.

COVID and Pertussis testing can be performed on this swab – Only if requested at the same time. Sorry we are unable to add on requests later.
