

Waikato Respiratory Virus Report

Week 39 2022

4 Oct 2022

Test numbers are drifting down, but virus detections are steady.

From 3 Oct onwards, we will be scaling back our routine screening for RSV and Influenza in Emergency Departments. RSV testing will only be routinely done for patients under 5 years old, but it will be available on request for any patient. Test numbers shown here should decrease but RSV detection should continue at present rates.
