

Reference Interval: Creatinine (Urine)

		<u>(mmol/L/24hr/Kg)</u>
Infant	=	.071 - .180
Child	=	.071 - .195
Adolescent	=	.071 - .265
Adult male	=	.124 - .230
Adult female	=	.097 - .177

Note:

Clearance >15 years 70 – 140 ml/min
Clearance <15 years reference interval
not well defined in this age group.

NB: To convert patient result to enable interpretation against these ranges
- divide result from patient in mmol/24hrs by patient weight in
kilograms.
