

Values are for males only

Total PSA:

40 - 49 < 2.5 ng/mL
50 - 59 < 3.5
60 - 69 < 4.5
70 + < 6.5

Reference interval is not defined for males < 40 years of age.

These values are a guide.

Results below these cut-offs does not exclude prostate cancer.

Results above the cut off does not necessarily indicate prostate cancer.

% Free PSA:

Probability of prostate cancer on needle biopsy for PSA: 4 - 10 ng/ml and "normal" DRE

%fPSA ratio	50 - 59 years	60 - 69 years	70 years and older
< 11	49%	58%	65%
11 - 18	27%	34%	41%
19 - 25	18%	24%	30%
> 25	9%	12%	16%
